📍 Ludhiana, Punjab, India

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML)

2024 — Present

IKG Punjab Technical University Campus

Punjab, India

- **Current CGPA:** 8.9 / 10.0 (Up to Current Semester)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming in Python, Applied Linear Algebra, Probability & Statistics, Introduction to Artificial Intelligence.

Senior Secondary School (Class XII) — PSEB

2024

Government Senior Secondary School

Ludhiana, India

- Aggregated Score: 92.4% (Non-Medical stream with Computer Science focus)

TECHNICAL SKILLS

Languages: Python (Advanced), SQL, C++, HTML/CSS

AI/ML Libraries: NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn

Developer Tools: Git, GitHub, VS Code, Jupyter Notebooks, Linux Linux CLI

Core Concepts: Object-Oriented Programming (OOP), Data Science Foundations, Predictive Analytics, Matrix Computations

ACADEMIC PROJECTS

Predictive Housing Price Modeling Engine

Python, Scikit-Learn, Pandas

- Engineered an end-to-end regression pipeline analyzing multi-dimensional regional socio-economic datasets to predict real estate valuation matrix offsets.
- Implemented meticulous data preprocessing, including handling missing parameters, categorical multi-label encoding, and strategic outlier reduction.
- Utilized a mathematical linear hypothesis formula $y = w^T x + b$ to map input features to continuous target pricing bounds, optimizing performance using Root Mean Squared Error (RMSE).
- Evaluated Model convergence against Random Forest baselines, securing an R^2 evaluation metric accuracy score of 88.4%.

Automated Student Performance Clustering System

NumPy, Scikit-Learn, Matplotlib

- Developed an unsupervised machine learning algorithm utilizing the K-Means framework to group historical student performance attributes into granular internal clusters.
- Utilized NumPy for highly optimized matrix computations and multidimensional vector operations during iterative centroid recalculation cycles.
- Visualized multidimensional data distribution clusters using PCA dimensional minimization algorithms to present clear operational analytics to academic stakeholders.

POSITIONS OF RESPONSIBILITY / EXTRA-CURRICULARS

Core Technical Member

2025 — Present

Campus AI & Developers Student Club

Ludhiana

- Organized weekly technical hands-on workshops introducing Python programming and data frame manipulation concepts using Pandas/NumPy to over 60+ junior peers.
- Collaborated in internal programming hackathons, solving multi-tiered exploratory algorithm obstacles within aggressive production timelines.

CERTIFICATIONS & ACHIEVEMENTS

- **Python for Data Science and Machine Learning** — Coursera Verified Certification (Honors Track)
- **Hackathon Runner-up** — Inter-College AI Prototype Pitching Challenge (2025)
- Ranked top 5% in regional mathematical talent assessments during secondary school education matrices.
